VERTICA

The International Journal of Rotorcraft and Powered Lift Aircraft

Editor-in-Chief
Professor P. Friedmann
Mechanical, Aerospace and Nuclear Engineering Department, University of California,
5732H Boelter Hall, Los Angeles, CA 90024, U.S.A.

Associate Editors

Dr D. Banerjee
Chief Aeromechanics R&D, Hughes Helicopters,
Culver City, CA 90230, U.S.A.

Dr W. Johnson
505 Hamilton Avenue, Apt 309A, Palo Alto,
CA 94301, U.S.A.

Editorial Advisory Board

Professor I. C. Cheeseman
University of Southampton, U.K.

Professor A. Azuma
University of Tokyo, Japan

R. Dat
ONERA, Châtillon, France

Professor G. T. S. Done
The City University, London, U.K.

Professor R. B. Gray
Georgia Institute of Technology, U.S.A.

Professor N. D. Ham
Massachusetts Institute of Technology, U.S.A.

Mr Anton J. Landgrebe
United Technologies Research Center, U.S.A.

Dr M. V. Lowson
Westland Helicopters Ltd, U.K.

Professor R. G. Loewy
Rensselaer Polytechnic Institute, U.S.A.

Dott. Ing. B. Lovera
Construzioni Aeronautiche
Giovanni Agusta S.p.A., Italy

Dr Robert A. Ormiston
US Army Research & Technology Labs, U.S.A.

Professor D. A. Peters
Georgia Institute of Technology, U.S.A.

M. G. Petit
Société Nationale Industrielle Aérospatiale
France

G. Reichert
Technical University Braunschweig,
West Germany

Dr R. E. Singleton
U.S. Army Research Office, U.S.A.

Professor H. Wittenberg
Technische Hogeschool Delft, The Netherlands

Subscription Rates (1987)

Annual institutional subscription rate (1987) DM 425.00; 2-year institutional rate (1987/88) DM 807.50; personal subscription rate for those whose library subscribes at the regular rate (1987) DM 157.00.

Subscription enquiries from customers in North America should be sent to: *Pergamon Journals Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A.* For the remainder of the World to: *Pergamon Journals Ltd, Headington Hill Hall, Oxford OX3 0BW*, England (*Tel.* Oxford (0865) 64881). Prices are subject to amendment without notice.

Microform Subscriptions & Back Issues

Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

Publishing Office

Pergamon Journals Ltd, Journals Production Unit, Hennock Road, Marsh Barton, Exeter, Devon EX2 8NE, England (*Tel.* Exeter (0392) 51558; *Telex* 42749).

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights ro reproduce and distribute the article, including reprints, photographic reproductions, microform, or any other reproductions of similar nature, and translations. No part of this publication may be produced, stored in a retrieval system, or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording, or otherwise, without permission in writing from the copyright holder.

Photocopying information for users in the U.S.A.

The Item-Fee Code for this publication indicates that authorization to photcopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the U.S. Copyright Law is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works or for resale.

Permission for other use

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying. Please contact the Subsidiary Rights Manager (Publishing Services) at either Pergamon Journals Ltd (Oxford) or Pergamon Journals Inc. (New York).
The Item-Fee Code for this publication is: 0360-5450/86 $3.00 + 0.00

Volume 10, 1986

Number 1

W. J. McCroskey, Ph. Spalart, G. H. Laub, M. D. Maisel and B. Maskew	1	Airloads on bluff bodies, with application to the rotor-induced downloads on tilt-rotor aircraft
P. R. Edwards	13	A description of Helix and Felix, standard fatigue loading sequences for helicopters, and of related fatigue tests used to assess them
A. Rosen and O. Rand	35	A general model of helicopter blade dynamics
M. Negrin, A. Grunwald and A. Rosen	51	Preliminary study of man–machine problems in hovering above a moving platform
Mark D. Betzina, Charles A. Smith and Patrick Shinoda	65	Rotor/body aerodynamic interactions
F. Persiani and R. Trippodo	83	Experiments in superplastic forming of helicopter components
G. Samanni and C. Zanotti	93	The effects of matrices formulation on mechanical properties of epoxy glassfiber prepregs

Number 2

Wayne Johnson	109	Recent developments in the dynamics of advanced rotor systems—II
Marcelo R. M. Crespo da Silva and Dewey H. Hodges	151	Nonlinear flexure and torsion of rotating beams, with application to helicopter rotor blades—I. Formulation
Marcelo R. M. Crespo da Silva and Dewey H. Hodges	171	Nonlinear flexure and torsion of rotating beams, with application to helicopter rotor blades—II. Response and stability results
B. Cantaloube and S. Huberson	187	A new approach using vortex point method for prediction of rotor performance in hover and forward flight
D. C. Bannerman and C. M. Kindervater	201	Crash impact behaviour of simulated composite and aluminium helicopter fuselage elements
H. Cocking	213	The design of an advanced engineering gearbox
W. Z. Stepniewski and R. A. Shinn	227	Soviet and U.S. weight-prediction methods as tools in helicopter optimization
J. W. Gunnink, M. L. C. E. Verbruggen and L. B. Vogelesang	241	ARALL, a light weight structural material for impact and fatigue sensitive structures

Number 3/4

F. E. Staples, P. J. Jones and W. E. Schmidt	255	Elastomeric rod end bearings: a solution for improving reliability and maintainability
Harry L. Runyan and Hsiang Tai	269	Application of a lifting surface theory for a helicopter in forward flight
Michael A. McVeigh	281	The V-22 tilt-rotor large-scale rotor performance/wing download test and comparison with theory
David L. Key and Edwin W. Aiken	299	Aircrew–aircraft integration: a summary of U.S. Army research programs and plans
Harold R. Alexander, Martin D. Maisel and Demo J. Giulianetti	315	The development of Advanced Technology Blades for tilt-rotor aircraft
Ulrich Leiss	341	Unsteady sweep—a key to simulation of three-dimensional rotor blade airloads
Gunjit Bir and Inderjit Chopra	353	Prediction of blade stresses due to gust loading
	379	Announcement
